Understanding Bipolar Disorder

Wednesday, April 25, 2018 | 7-9 PM

Congregation Shaarey Zedek | 27375 Bell Road | Southfield, Michigan

This free event is open to the public, but pre-registration is required.
Please register here: michmed.org/EDr70

Bipolar Disorder can be a devastating illness, for both individuals and families. It is a chronic disease with unstable and unpredictable moods. However, the positive news is that bipolar disorder is treatable, and new research advances are underway. Join experts to learn more about the latest research on the causes and treatments for bipolar disorder.

A presentation by Melvin McInnis, M.D., Research Director for the **Heinz C. Prechter Bipolar Research Program at the University of Michigan**, in collaboration with **Kadima**, and a panel of experts to answer the audience's questions.
